Keywords: Geotechnics and Structural Integrity, New Concepts

1 Introduction

This template for the annual EAWE Ph.D. seminar shall be used in the preparation work of the paper or extended abstract when using L^AT_EX. The total length of the document is max 2 pages for extended abstracts/ 8 pages for papers including figure/figures, which is optional.

The format and typesetting of this abstract is listed below:

- 1 Paper size is A4 with text width and height of 130 and 200 mm, respectively.
- 2 Font to be used is ‘Computer Modern’ (L^AT_EXstandard font) with justified side alignments and the font sizes are:
 - Title 17pt., Abstract text 9pt., Main text, Author list, figure captions and bibliography 10pt., Footnotes if any 8pt.
- 3 The title and authors should be in bold and the presenting author should be underlined.
- 4 Author affiliation is done with footnotes with the number format “a,b...” if necessary.
- 5 References area done with parentheses with the number format “1,2,...”. Surname and first letter of the first name of the author should be used followed by the year. The title of the reference should not be given, however, the journal name in italic, volume in bold and first page number should. See below for an illustration [?],[?].

Make sure that the labels and all other text in the figure/figures have readable and comfortable font size, i.e. not smaller than 10pt. Check this by comparing the figure text with the text in the abstract which is 10pt. Use a suitable format of the figure file. Below the abstract, state some keywords from the list of topics

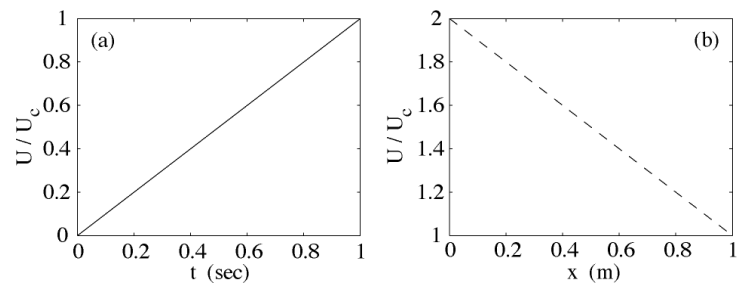

Figure 1: (a) Velocity distribution in time. (b) Velocity distribution in the downstream direction.
